

## Professional Acoustic Treatment Systems

The Dimension4™ systems are the latest series of pre-engineered acoustic treatment solutions from MSR, Inc. They are designed for professional recording studios, project studios, media rooms, and game developers. Dimension4 systems are full-frequency solutions that provide improved accuracy, focus, envelopment, and tonal balance.

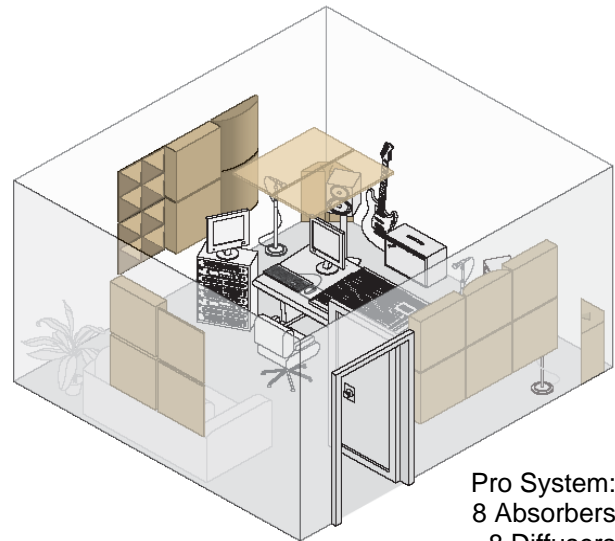

Dimension4 systems are available in three performance levels: Pro (high-end), Project (intermediate), and Prime (entry-level). Utilizing a scientific combination of high-performance absorbers, diffusers, and bass traps, each system is calculated to provide the best sound quality for small, medium, and large rooms.

Dimension4 systems feature modules for your walls that provide reflection and echo control, as well as spatial diffusion. Also included are ceiling panels to dissipate detrimental vertical first reflections and bass absorber traps (placed in corners or on the front wall) to address the low-frequency balance of the room. The absorbers in all three system levels utilize a patented composite of environmentally friendly Rockwool and fiberglass for high-performance sound control.

### Dimension4 Pro

As the flagship of the Dimension4 series, the Dimension4 Pro system offers high-end acoustic control for the uncompromising recording engineer. Dimension4 Pro is at home in the most demanding recording spaces. Available in a variety of wood finishes and fabric colors.

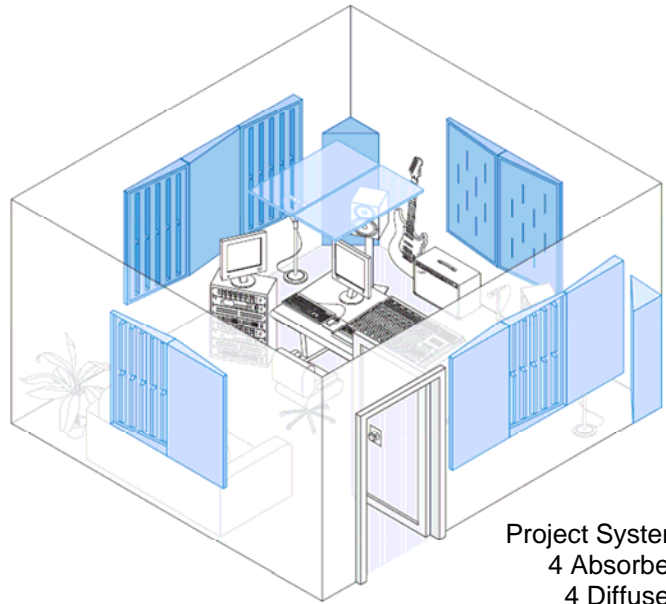

Pro System:  
8 Absorbers  
8 Diffusers  
2 Bass Traps

MSRP: \$3,199

### Dimension4 Project

The mid-level Dimension4 Project system offers enhanced sound control for the quality-conscious recording engineer. With its high-performance composite absorbers, the Dimension4 Project system is the ultimate choice for project studio and game audio production environments. Diffusers and low-resonance synthetic bass traps round out the system's spectral balance and spatial width. Panels are available in a variety of colors.

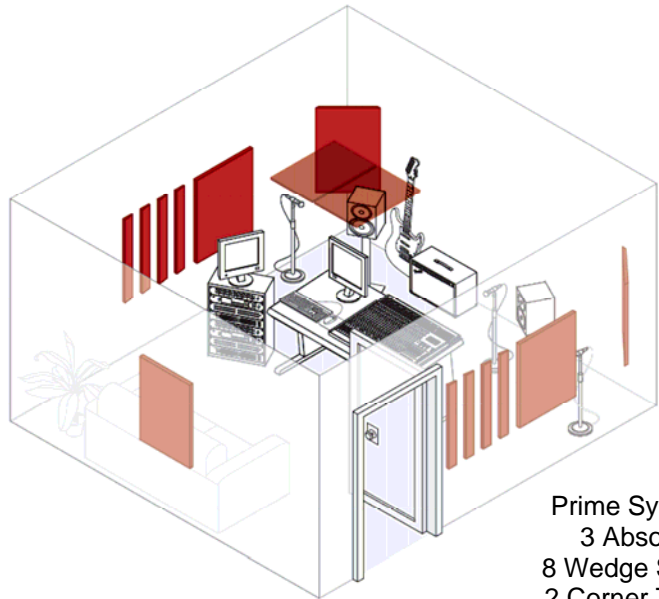

Project System:  
4 Absorbers  
4 Diffusers  
2 Bazorbers

MSRP: \$1,799

### Dimension4 Prime

The entry-level Dimension4 Prime system offers outstanding value and room control for the budget-conscious recording engineer. Utilizing patented composites of Rockwool and fiberglass for high-performance sound control in its absorbers and diffuser strips, the Dimension4 Prime system is the ultimate in flexibility and value. Absorbers are available in gray and tan.

Prime System:  
3 Absorbers  
8 Wedge Strips  
2 Corner Traps  
2 Ceiling Clouds

MSRP: \$799

MSR also supplies a full line of acoustic materials including: absorption treatments in any size and shape, diffusion treatments, bass traps, specialty sound isolation construction materials, and sound doors and windows.

The MSR-exclusive SpringTrap™ bass trap received the Mix Magazine "Certified Hit" award.
